**Planning For My Future**

When I was a child, I always thought about what I would become in the future. However at this moment, I still do not know the answer, but I think I will soon know because, from now on I am going to plan for my future.

In the future, I think I should study hard and then study at University to get a good education. After completing my education, I will find my dream job which is to be a veterinarian, taking care of sick and injured animals and pets. I think this job will be fun. Also, a vet's working hours are not very long, so I can go home and have dinner with my parents every evening.

In order to maintain a healthy life style, I will go cycling once a week with friends or play other sports with my friends or with my parents at least once a year. Another future ambition

is to travel as a way to release stress. I would also like to around the world and, when I have a job, I think I will achieve that ambition.

If my life only focuses on working or studying, it will be very boring so I will hold a party for fun when I have time. For my love life, I think I will not get married early because I want more freedom. I am afraid that once I get married, my wife will not allow me to play with my friends.

This is my plan for the future. Although this is not a wonderful one, it is a happy expectation that I have set for myself.
