

Good morning, Principal, Vice Principals, teachers and my fellow schoolmates.

Today, I would like to share my thoughts on why we need the ability of speaking good English. In my view, “good English” means that you can speak with clear pronunciation and fluency. So, why is this so important?

Last week Miss Cheng said that speaking good English can help you get a date with a girl. And today I want to focus on “future career”. As you know, when you grow and work for a company, you will have many opportunities to work with foreigners. Most of them won't know how to speak Cantonese or Putonghua, but only English. So I am very sure that the bosses in Hong Kong will like their staff to speak fluent and clear English.

So for your future, I suggest all of you to try to speak more English in daily life, either with teachers or friends, or even me. You can just come to 6A to find me or meet with one of our committee members to chat with you. Don't be afraid!
Thank you.
