Topic: Financial Crisis and personal goals

Principal, vice principals, teachers and fellow schoolmates,

Good morning, I am Brian Tam from 7A. I am sure all of you have heard about the financial crisis that affects the whole world. In HK, many shops closed down, and the unemployment rate keeps on increasing, inflation exists everywhere, and I think some of your parents may even suffer loss from the stock market or anything related to finance. All these seem to be a distressing situation for HK people.

However, some businessmen think there are many opportunities to gain profit in this moment. In fact, many shops or restaurants like the Fairwood have aspirations to extend their business in this arduous moment as they believe the difficulty can be overcome. What I want to say, is that crisis exists everywhere, throughout our whole life. What we need to know is the way to face them, deal with them and solve them. For example, if you feel depressed since you cannot get good results in the exam this time, just try your best to do revision immediately and aim at the mid-term exam. Or when you face difficulties in the future, don't give up easily, you should try to analyse and solve the problems from different perspectives. That's all for my sharing, thank you.
