

Halloween

Halloween has become a very popular festival in HK, especially among the teenagers.

Many commercial malls decorated their buildings aim to attract people, stimulate consumption and celebrate fiesta because of the financial tsunami and feast. For example, they used fake human organs, grave, coffins even sexual offenders like rapists and some criminals to adorn their places. It seems to suit with the atmosphere of Halloween. But, the decorations might trigger more negative emotion or convey the killing and death culture to children and adolescents.

From the view of these companies, this action can be justified because it can enhance business and generate more profits.

However, they also justify the illegal act, promote criminal sense and make killing reasonable. I think they should confine their election of adornment or use some cartoon' s characters dressing up the Halloween clothes instead of the criminals.

What type of characters should be chosen in celebrating the festival, let us think about it!
