

Good morning, Principal, Vice-principals, teachers and fellow schoolmates

Many students said English is difficult and it's hard to get a high mark in examination. Today, I would like to share the methods of how to improve our English with you.

To improve our English, especially grammar, we should do more practices, and make notes for ourselves, so we'll remember different types of grammar and English usage. Remember, making our own notes is very important, because when we are making notes, we are trying to organise what we have learnt systematically and we can check if we understand that what we have learnt. Moreover watching English TV and movies are also very helpful.

I would recommend you to read more English books regularly, Reading English books can enrich our vocabulary bank and improve our comprehension skills.

If you do not have the habit of reading English books, you can start with some simple fictions first, try to develop this habit and you will improve your grammar as well as enjoying the books

This is the end of my sharing. Thank you.
