

## Drug Abuse

Good morning. Today I am going to share with you a hot issue. Drug abuse seems to be a challenge in modern societies. Recently, our government has promoted the anti-drug addiction programme in secondary schools in Tai Po. I totally agree to this policy.

Firstly, such a programme has been successfully carried out in most international schools for several years. It received positive feedback from both students and parents.

Drugs cause lots of life-long harm to young people. Apart from creating psychological problems, they also influence teenagers to commit crimes to get money from drug trafficking. In order to prevent students from indulging their lives in drugs, I support this programme. Remember, "No drugs, No regrets. Not now, Not ever".

Thank you.
