

How to Equip Ourselves for the Future

Good morning Principal, Vice Principals, teachers and fellow schoolmates.

Today I would like to take this opportunity to share with you about how to equip ourselves for the future. According to the latest Hong Kong figures, the unemployment rate is 5.4 percent this year. This means that it is quite difficult for citizens in HK to find a job, especially those who have left secondary school recently. We know that many graduates can't get a job in the labour market.

So we need to equip ourselves immediately and effectively. For example, we have to improve our interviewing skills and keep watching global news. It is necessary for us to take courses such as Business Writing and Interviewing Skills to update our knowledge and develop the attitude of life-long learning.

No matter what kind of job you are looking for, good preparation is very important. This can affect the first impression you give and your opportunities in getting the job. Remember, chances are only opened for those who are well-prepared.

Thank you.
