

Guangzhou-Shenzhen-Hong Kong Express Link

Good morning Principal, Vice Principals, teachers and fellow schoolmates,

This morning I would like to share my opinion on the building of Guangzhou-Shenzhen-Hong Kong Express Link. The express rail link becomes one of the hottest issues in Hong Kong nowadays with different groups of people having debates on this issue.

It is indeed a good decision to build this 350 km link across the Pearl Delta as it brings conveniences to many people. But this link has brought many other issues. Many people are concerned with the Double Construction with West Rail, Kam Sheung Road was abandoned in the consideration of its terminus and another tunnel costing billions of dollars will be built. This will lead to demolishing of Tsoi Yuen Village. Not only the natural environment but also the life of villagers will be destroyed.

I think the government should review the construction plan of the link not only development of economy but also encourage the bloom of green industry and green economy. Thank You.
