

## *Prepare for the Examination*

Good morning Principal, Vice-Principals, teachers and fellow schoolmates,

The second term exam ended and the third term has started. We have prepared for the second term exam with great effort but some may still be disappointed because they did not perform as good as they expected.

Although I am upset as well, I think I should work harder because the third term exam is more important than the first and second term exam. If you haven't done well enough in the first or second term exam, don't be disheartened because you can do well in the third term exam. You can review your notes more and start your revision earlier. Hope you can get a satisfactory result in the coming exam. Thank you.
