

How to Prepare for the Final Examination

Good morning Principal, Vice Principals, teachers and all schoolmates,

Second Term Exam has already come to an end. Are you satisfied with your results? Have you tried your best in the preparation of Second Term Exam? If you want to get better results, first of all, you have to change your learning attitude. Maybe you are wondering why your results were not as good as you expected, but don't have any negative thinking such as "The exam paper is very difficult" or "I can't do it". For example, if you think all English vocabulary items are difficult, you will be afraid of English. Then, you will give up easily.

What you have to do is to get rid of all negative thinking, think positively! "I can do it." Or "I am able to overcome all difficulties." Then, you will have an impetus to improve your results. Starting to learn the area that you are interested in is important. For example, if you like playing basketball, you can learn words about it, such as 'defend', 'assist' and so on. These words usually appear in the basketball competition. You can use them in a suitable way. Hope you will get flying colours in Final Exam. Thank you!
