

Neighbourhood

Good morning Principal, Vice-principals, teachers and students

Do you know your neighbors? If you do not, please start to know them today. A few days ago, a man in Kwai Chung launched a series of deadly attacks with a chopper that left two neighbors dead and three seriously injured. That man had a history of mental illness and had threatened people in his public housing estate before.

From this tragedy, I learn that we should pay more attention and care for our neighbors. Mutual help and respect are important in building a harmonious relationship among neighbors as well as a happy living environment. This is the end of my sharing, thank you!
