

Computer Safety

Good morning Principal, Vice Principals, teachers and fellow schoolmates,

Today, I would like to share with you about computer safety. We are in the age of computer. We use it to work, play online games or surf the Net. Nobody can deny that computer isn't our necessity.

However, when we use the computer, we may not know somebody is trying to destroy our computer system. You may probably think of computer viruses or hackers immediately. Yes, you are right, but have you done anything to protect your computer?

If not, you should think about installing antivirus software and saving back-up files in thumb drives starting from today. Although computers make our life convenient, they will bring lots of troubles if we don't use them safely. Thank you.
