

Today, I will share an interesting book called Charlie and the Chocolate Factory.

This book is about five lucky children who found golden ticket in Wonka Chocolate. They can go to the Chocolate Factory, if they behave well and children can own the Chocolate Factory.

Charlie Bucket is the poorest among the five children, but he behaves the best. The factory owner Mr. Willy Wonka decided to give the chocolate Factory to Charlie, but Charlie refused because he has to leave his family and live in the chocolate factory forever.

This book has told us, parents are the most important in the world, so I think family is the most important too. I hope you will treasure your family too. This is the end of my sharing. Thank you.
