

### **My Favourite Book**

Today, I want to share with you my favourite book which is called “Fundamentals of Building Construction”. The book is about the ways to make a building and what is inside a building. There are not many pictures but a lot of words.

The book is difficult but I like it very much because my father is a mechanic and he has taught me a lot of things about his job. I want to learn more about mechanics by reading books. That’s my sharing for today.

Thank you.
