

Good morning everyone I am Jason from 6A. Have you guys ever thought that there is a world that we don't know, which is full of magic? The book I am going to share with you today is all about magic.

I think most of you have already heard about this book before. This is the Harry Potter series. It's a series of fantastic novels written by J.K Rowling, and today I am going to share the first book of these series, Harry-Potter and the Philosopher's Stone.

The story talks about a boy named Harry Potter, whose parents were murdered by Lord Voldemort when he was small. Voldemort tried to kill Potter, but he was protected by some kind of power, and this power accidentally killed Voldemort. 10 years later, Potter received a letter that invite him to join a magic school named Hogwarts.

While Potter was studying in Hogwarts, a lot of things happened to him. My favorite part is where Lord Voldemort tried to steal the philosopher's stone for his return. But Potter successfully stopped Voldemort with his friends Hermione and Ronald. At last they successfully saved the philosopher's stone and beat Voldemort.

I think this book is very interesting and exciting. When Harry and his friends encountered the enemy, he taught me that bravery and justice are very important. Also, I realize that the power of friendship is very strong, so we should maintain a good relationship between friends.

My favorite character in this story is Harry Potter, for me he is kind to friends, modest, smart, selfless and the battle scenes of him are cool. In this story he faced a person who had kill a lot of people before, but he wasn't scared of him. Instead he saved his friends from danger so many times, so I think he is the bravest person in this story.

This is an amusing story with simple English words, and I am sure that you cannot help reading it. I strongly recommend this book to all of you. Thank you for listening.
